SALVAGE COLLECTION

The salvage drive during the past year accomplished a two-fold purpose. It obtained much needed scrap metal for the government and provided sufficient funds to cover the entire cost of civilian defense. Proceeds were as follows:

First sale,	\$112 95
Second sale,	85 24
	<hr/>
Total,	\$198 24
Cost of civilian defense,	197 82
	<hr/>
Excess credit,	\$ 37

The major part of civilian defense expense consisted of materials required to build the aircraft warning post; shingles, windows, door, clapboards, etc. When world peace is regained we shall have a trim and serviceable building for town purposes. In this splendid achievement thanks and congratulations are due to:

The salvage committee for its energetic and efficient work,

The Andorra Forest Products Company for their donation of a large quantity of lumber over and above that charged and for the fine flag pole which is in place behind the monument,

The men who volunteered to build the post and put in many hours of labor without pay.

REPORT OF SUPERINTENDENT OF SCHOOLS

To the School Board and Citizens of Marlow:

I hereby submit my annual report as Superintendent of Schools:

ORGANIZATION AND ENROLLMENT

No changes were made in the teaching personnel.

Instruction in the schools is being accomplished in accordance with the standards for the State. Standard achievement tests are given each year and reports are required relative to the work completed in all grades.

Our testing program is principally diagnostic in nature. The purpose is to diagnose difficulties and weaknesses which may occur in the fundamentals. The results are used as a guide to instruction and as a basis for remedial work. In each school a program of remedial work is developed as the needs of the pupils are indicated by the results of the tests. Attention is given to individual as well as to group needs.

During the past year the schools in the supervisory union have engaged in many activities associated with the conduct of the war. The teachers, in addition to their regular duties, have directed salvage drives, promoted the sale of war savings stamps and bonds, participated in various phases of civilian defense, and have conducted rationing registrations. This added responsibility has required many extra hours of study, planning, and work. However, it has been accepted by the teachers as a patriotic duty and as an opportunity to serve the people in the communities where they are teaching.

Practically all of the schools took an active part in the salvage drive. War Savings Stamps were on sale in most of the schools. A summary of reports received from all schools showed that over one hundred tons of scrap were collected by the pupils and several thousand dollar's worth of stamps and bonds were purchased.

Teachers and janitors have been especially economical in the use of school supplies. Although we have not as yet been out of stock on any items, it is evident that certain materials now in stock cannot be replaced or at least cannot be purchased within the limits of reasonable economy. As we approach this situation we must expect to restrict our needs to essential materials which we shall undoubtedly be able to purchase in limited quantities.

Events of recent date have made us especially mindful of the safety of pupils while in the school buildings. In all of our schools the need for regular fire and air raid drills has been emphasized. Regardless of the size of building and the number of pupils enrolled, these drills should be conducted at regular intervals during the year. School buildings have been under constant surveillance for fire hazards, availability of exits, and location, supply and condition of fire fighting equipment. However, not enough attention has been given to the safety of pupils and adults during special programs held either in the school rooms or in other public buildings. In the interest of public safety, I recommend that the same precautions now taken to assure the safety of pupils while in attendance at school be extended to school activities, programs, and entertainments held in the school building or at the town hall.

The shortage of teachers which became increasingly apparent during the summer months has developed into a very serious problem. The schools in the supervisory union opened for the fall term with nineteen new teachers. This represents a forty-one percent turnover. Fortunately, all vacancies were filled by qualified permanent teachers when school began in September. The situation is further complicated in rural areas by the rationing of gasoline and tires and the difficulty of locating desirable boarding places. Because of the very limited supply, the situation next year will be even more serious. Although we cannot hope to compete with the financial inducements offered by defense industries and larger districts, we are fortunate that teachers as a group are professionally minded and prefer teaching to other work. Also many teachers prefer to work in smaller towns if conditions can be made at

all suitable. However, there is a limit to the sacrifices which they can be expected to make in view of the opportunities offered elsewhere.

In accordance with the recommendation of the State Board of Education and the new regulations of the office of Defense Transportation, the two transportation routes covering the district were combined. Compliance with this order was necessary to assure continued approval for gasoline and tires. The school bus now serving the combined routes is of sufficient size to permit any probable increase on either route without additional expense.

HEALTH

A great deal is said these days about the importance of health education. The nation was shocked to find so many people below ordinary health standards when men were called into service. Wartime is no time to neglect health, in fact the war is proving a powerful stimulus to the improvement of health.

A health program depends upon many things: good health habits such as adequate and proper diet, sufficient rest, and understanding the laws of hygiene; proper medical care, with regular physical examinations and periodic dental checkups; the correction of physical defects; the provision of suitable housing. All of these are the responsibility of every individual and every agency in the community. The contribution of the school in this field may be almost unlimited.

It is the right of every child to be helped to learn the fundamental rules of health. Our schools should place more emphasis on good health habits, a study of nutrition for all pupils, physical education, and the importance of regular physical examination with remedial follow up.

Health inspection showed the following defects:

41 pupils were inspected.

35 pupils were in need of dental care.

7 pupils were advised to have throat and nose examination by a physician.

6 pupils were underweight.

A dental clinic was held October, 8, 1942.

Number of pupils treated,	17

3 pupils had tonsil and adenoid operations.

1 pupil had special eye examination and defect corrected.

27 pupils were given hearing tests with the audiometer.

There was no hearing loss.

BUILDINGS AND EQUIPMENT

Both chemical toilet tanks are in urgent need of replacement. Since the original installation has lasted about eighteen years, it has given unusually good service. A temporary deodorant tank is being used as an emergency arrangement in the boys' toilet. A second hand stove in excellent condition was procured to replace the old stove in the primary room. The windows in the hallway have been screened on the inside with one-quarter inch mesh heavy wire to provide a shelter, for use as a refuge in case pupils are confined to the building in an air raid.

STATISTICAL REPORT 1941-1942

The total registration exceeded that of the previous year by 21 pupils.

I wish to thank the members of the School Board, teachers, parents, and pupils for their co-operation during the year.

Respectfully submitted,

CHARLES D. DALZELL,

Superintendent of Schools.
